# Optional Fixtures for CTR960

CTR960 Countertop Router

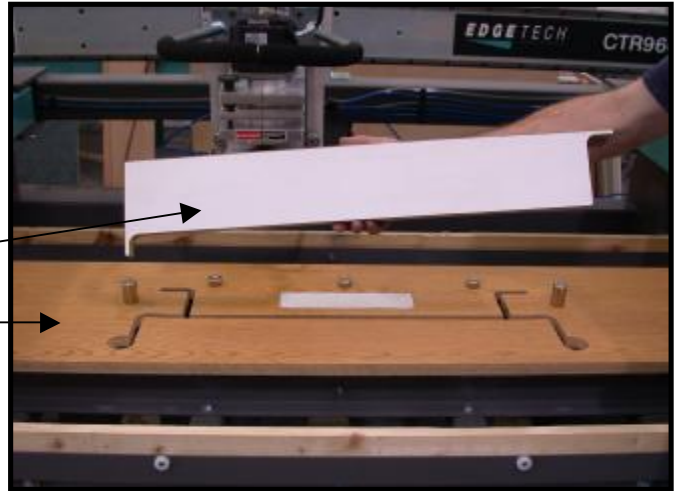

In addition to the innovative guide system on the CTR960 Countertop Router (which allows the routing of many standard openings without using a template), Edgetech offers two innovative template fixtures for the CTR960...

## Template for Coped Sidesplash Blocks

Coped sidesplash blocks provide a nice finish where the countertop meets a sidewall. These coped sidesplash blocks can be produced quickly and easily on the CTR960 with a custom **Sidesplash Template Fixture** made to match the customer's countertop profile(s).

## Template for Laminate Endcaps

Laminate endcaps for capping the exposed ends of a countertop can be produced quickly and safely on the CTR960 using a special **Laminate Endcap Template Fixture** from Edgetech. This pneumatic fixture clamps several pieces of laminate securely in place and can produce 10-12 laminate endcaps at time.
