Hot Melt Coating Equipment

M107D Hot Melt Roll Coater

The M107D is designed to apply coatings for a variety of applications, including hot melt heat-activated coatings, hot melt product assembly coatings, hot melt pressure sensitive coatings and hot melt protective coatings.

The M107D has a temperature controller to prevent premature startup and the phenolic gear in the previous model has been eliminated, reducing maintenance expense.

The dual rollers on the M107D automatically feed the material through at a uniform rate and quickly apply an even honey-comb pattern of hot melt adhesive.

Rear View

Standard Features

- Temperature Controller
- Cast Aluminum Reservoir Tray w/ Integrated Heating Element
- Adjustable Top Roller
- Adjustable Doctor Blade
- Gear Motor

Optional Equipment/Supplies

- Hand Roller
- Hot Melt Activator for reactivation of hot melt
- Hot Melt Adhesive

Specifications

| Specifications | |
|---|---------------------------------|
| Model | M107D |
| Material thickness | .020" to 1-1/8" |
| Material width | Up to 7" |
| Coating Speed | 70 ft per minute |
| Temperature – Thermostatically Controlled | 200° - 500° F |
| Electrical requirement | 120V - 60 Hz - 1 Phase - 15 Amp |
| Machine width x length x height | 22" x 18" x 12" High |
| Shipping weight (approximate) | 100 lbs. |

Production capacities and specifications are provided for the convenience of our customers and are not binding. The manufacturer reserves the right to make changes without notice. Please contact us if the above capacities and/or specifications do not meet your requirements.
